Accelerating the time for change in Oracle E-Business Suite

Webinar Mechanics

- Open and close your panel.
- View, select, and test your audio.
- Submit text questions.
- Raise your hand.
- Q&A addressed at the end of the session. Answers will be posted within two weeks on our new LinkedIn Group, EBS Answers:
<http://www.linkedin.com/groups/EBS-Answers-4683349/about>
- Everyone will receive an email within 24 hours with a link to view a recorded version of today's session.
- Polling questions will be presented during the session. If you want CPE credit for this webinar, you must answer all of the polling questions.

Accelerating the time for change in Oracle E-Business Suite

*e*prentise®

Learning Objectives

Objective 1: Learn the root causes of silos in Oracle E-Business Suite (EBS) implementations.

Objective 2: Understand how silos impair financial operations and create barriers to growth and innovation.

Objective 3: Explore how a convoluted EBS structure results in silos of data that constrict performance and limit agility.

Objective 4: Learn techniques to enable different areas of the organization to work together and eliminate silos of data.

Objective 5: See how an enterprise data quality initiative will facilitate breaking down silos.

Accelerating the time for change in Oracle E-Business Suite

Agenda

-  Introduction
-  The Tower of Babel in Oracle® E-Business Suite: Silos
-  Root Causes of Silos
-  Challenges and Impact of Silos
-  Roadmap to Eliminating Silos
-  Benefits of Eliminating Silos

Accelerating the time for change in Oracle E-Business Suite

Introduction: Finished but not Done

*e*prentise®: Transformation Software for E-Business Suite
Company Overview: Established 2006 • Helene Abrams, CEO

*e*prentise Can...

- Consolidate Multiple EBS Instances
- Change Underlying Structures and Configurations
 - Chart of Accounts, Other Flexfields
 - Inventory Organizations
 - Operating Groups, Legal Entities, Ledgers
 - Calendars
 - Costing Methods
- Resolve Duplicates, Change Sequences, IDs
- Separate Data

...So Our Customers Can:

- Reduce Operating Costs and Increase Efficiencies
 - Shared Services
 - Data Centers
- Adapt to Change
 - Align with New Business Initiatives
 - Mergers, Acquisitions, Divestitures
 - Pattern-Based Strategies
 - Make ERP an Adaptive Technology
- Avoid a Reimplementation
- Reduce Complexity and Control Risk
- Improve Business Continuity, Service Quality and Compliance
- Establish Data Quality Standards and a Single Source of Truth

Accelerating the time for change in Oracle E-Business Suite

The Tower of Babel

- 🐘 In the story of the Tower of Babel, people's inability to communicate – they were all speaking different languages - resulted in them being unable to finish constructing the tower.

- 🐘 The result: Project failure... all because of **silos**.

Accelerating the time for change in Oracle E-Business Suite

*e*prentise®

Objective 1: Learn the root causes of silos in Oracle E-Business Suite (EBS) implementations.

Accelerating the time for change in Oracle E-Business Suite

What are Silos?

Silo's are information locked in disparate databases, separate ledgers (SOBs), different operating units etc.

They are the barriers to doing business efficiently and effectively that are overcome everyday through workarounds or forgone opportunities.

Daniel Vasconcellos

Accelerating the time for change in Oracle E-Business Suite

*e*prentise®

Root Causes of Silos in EBS

Existing silos in EBS originated in several ways.

Most of these were due to a lack of:

- Available technology at the time of implementation.
- An understanding of how a global business should operate,
- Knowledge of EBS configurations, hierarchies, ownership, and security.
- A solution for quick integration of acquired systems (M&A activity).
- Interdepartmental communication and collaboration.
- Standardization:
 - *Process level:* corporate standards, governance, and controls
 - *Data level:* data formats, naming conventions

Accelerating the time for change in Oracle E-Business Suite

Root Causes of Silos in EBS

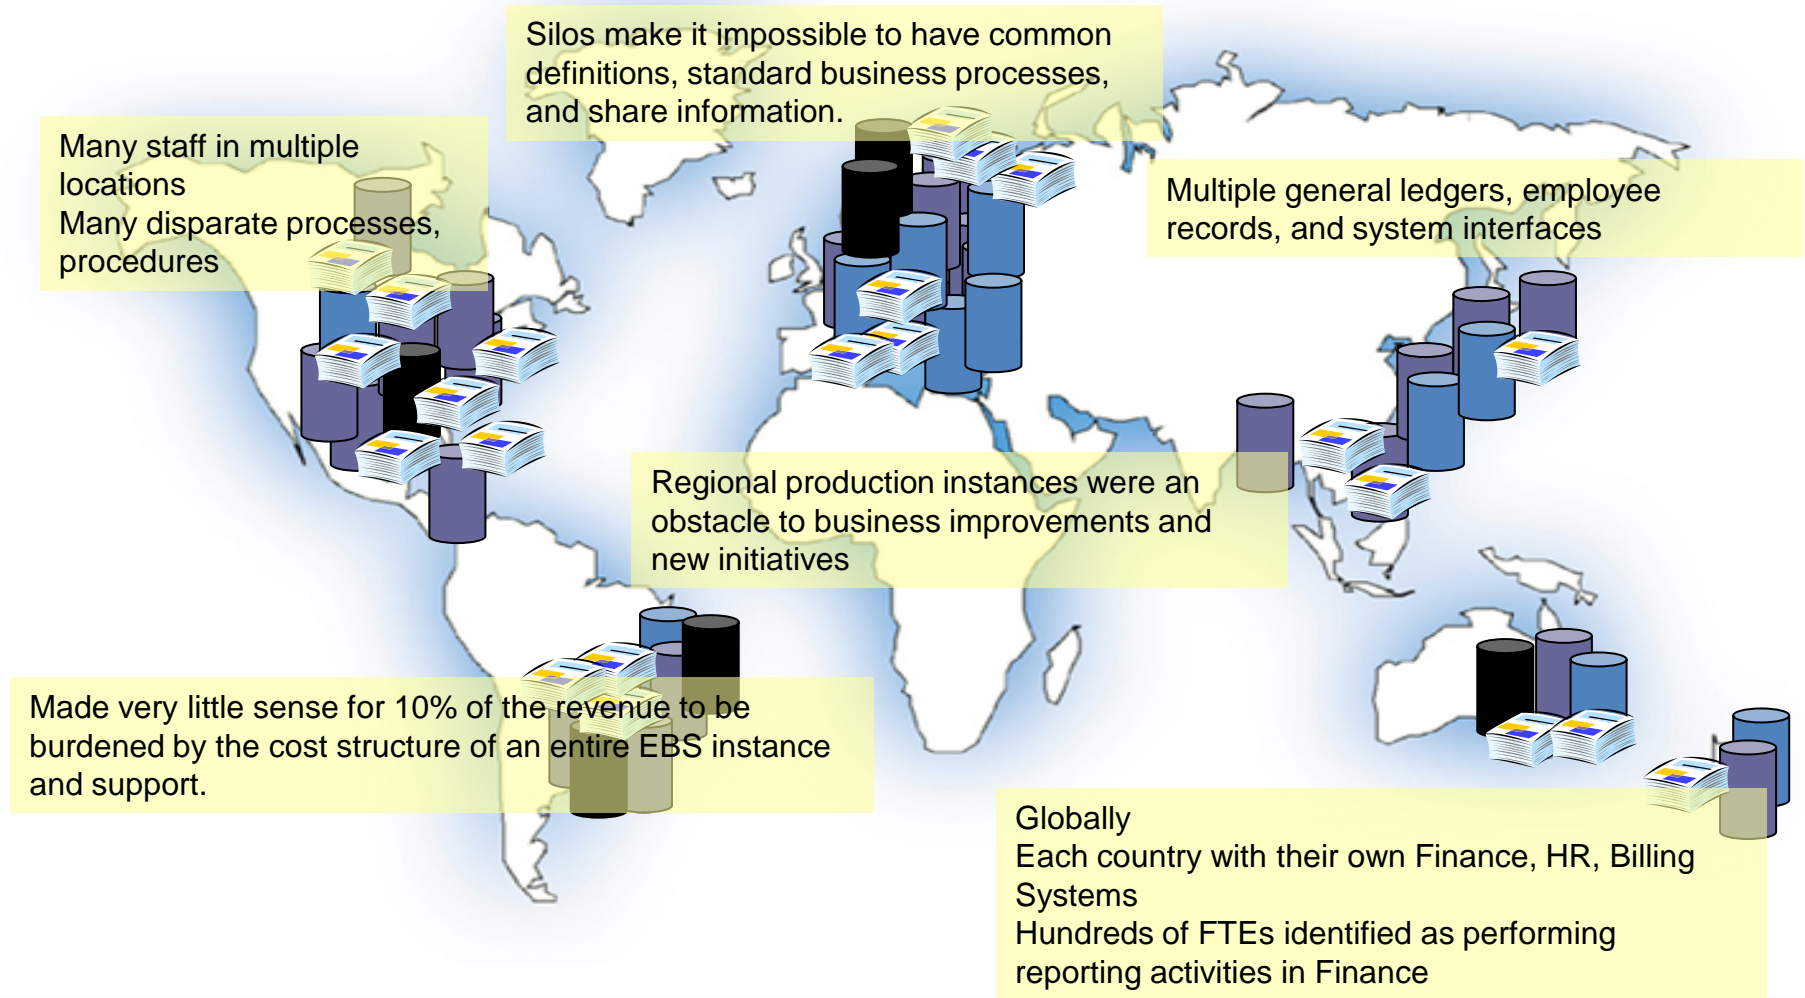

- 🐘 Different divisions within a company were allowed to setup their own operating units to meet their requirements eventually leading to fragmented integration, more complexity and isolation.
- 🐘 Company grew by acquisition adding new EBS instances with each acquired company.
- 🐘 Original configuration didn't support the current business – original setup including history abandoned for a new setup with no way to communicate between structures.
- 🐘 Different departments tackled requirements or problems on their own rather than working together to find a solution that fits everyone.
- 🐘 Corporate standards, governance, and controls were not in place – changes done “on-the-fly”.

Accelerating the time for change in Oracle E-Business Suite

Challenges for Global Businesses

Accelerating the time for change in Oracle E-Business Suite

Silos in Your Business

- 🐘 Many organizations face significant challenges in communication between disparate parts of the business.
- 🐘 Multiple instances, different charts of accounts, and a lack of governance and control result in silos of information and multiple sources of "truth."
- 🐘 Eliminate the silos to share data effectively, reduce costs and risks and communicate across the organization.

Accelerating the time for change in Oracle E-Business Suite

Objective 2: Understand how silos impair financial operations and create barriers to growth and innovation.

Accelerating the time for change in Oracle E-Business Suite

Examples of Silos By EBS Structure

Silo Impact	Statutory and Regulatory (SEC) Requirements	HR Management (i.e. Transferring Employees)	Tax Reporting Compliance	Customer Relations	Supply Chain Management (Vendor Relations)	Workflows
Separate Instances	✓	✓	✓	✓	✓	✓
Separate Business Groups		✓	✓			
Separate Sets of Books	✓	✓		✓	✓	✓
Separate Operating Units				✓	✓	✓
Separate Inv. Orgs.					✓	✓
Multiple COAs and Calendars	✓		✓			✓

Accelerating the time for change in Oracle E-Business Suite

When EBS
Silos are
Present,
Costly
Workarounds
Must be
Developed

Accelerating the time for change in Oracle E-Business Suite

Silos Impact Timely & Accurate Business Decisions

- 🐘 Trusted, uniform, and timely information is inaccessible to business users.
- 🐘 Inaccurate forecasts, contradictory information, and the inability to address compliance requirements result in increased costs and unnecessary risks.
- 🐘 “Very few organizations have a real handle on the relationship between a business process...and the underlying I.T. system that powers [it]...And worse yet, if they did...they would probably discover that they have four sets of different systems handling overlapping business processes.” - Michael Vizard says in Solving I.T.’s Biggest Challenge.

Accelerating the time for change in Oracle E-Business Suite

Objective 3: Explore how a convoluted EBS structure results in silos of data that constrict performance and limit agility.

Accelerating the time for change in Oracle E-Business Suite

Example of Silos

Charts of Accounts and Calendars
Disparate and misaligned

Sets of Books, Legal Entities, OUs, and Inventory Orgs
Redundant and configured differently

Instance	Sets of Books, Legal Entities, OUs, and Inventory Orgs				Distinct
Release	11.5.9				-
Size (GB)	548	81	98		-
Languages	2	1	1		4
Sets of Books	104	48	1	30	183
Calendars	10	7	1	1	19
Charts of Accounts	40	43	1	18	102
Legal Entities	120	48	0	47	215
Operating Units	121	48	0	47	215
Inventory Orgs	121	48	0	47	215

Redundant Objects

Charts of Accounts – Reports and data extracts must be done 40 times

Calendars – With 10 calendars, the company is depreciating assets in 10 different ways and closing periods at different times

Sets of Books – Difficult to comply with local and statutory regulatory requirements

Legal Entities – Easy to over- or under-pay taxes and misstate financial information

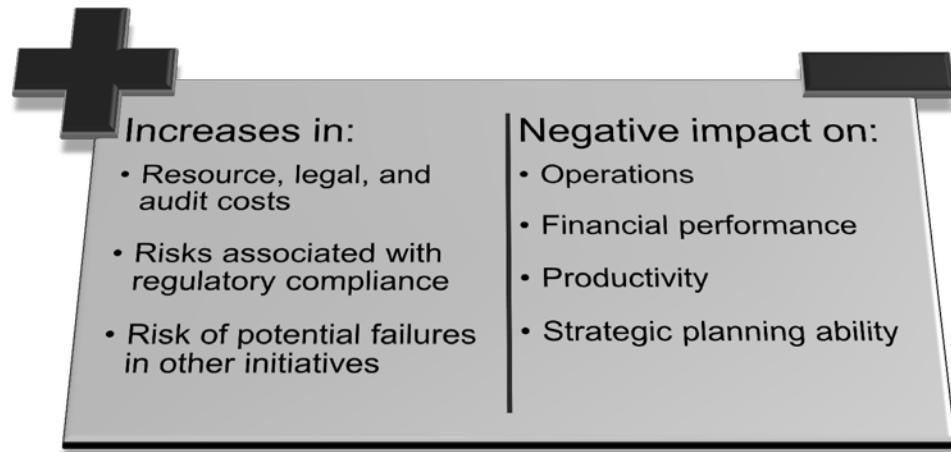

Operating Units – Difficult to leverage supplier relationships (terms, discounts, etc.)

Inventory Orgs – Impossible to know if a product is actually in stock (or where it is on the shelf)

Silos Constrict Performance and Agility

 There is no *single source of truth* for enterprise information.

 Leads to a lack of trust in the data, resulting in:

Accelerating the time for change in Oracle E-Business Suite

*e*prentise®

Objective 4: Learn techniques to enable different areas of the organization to work together and eliminate silos of data.

Accelerating the time for change in Oracle E-Business Suite

Steps for Eliminating Silos

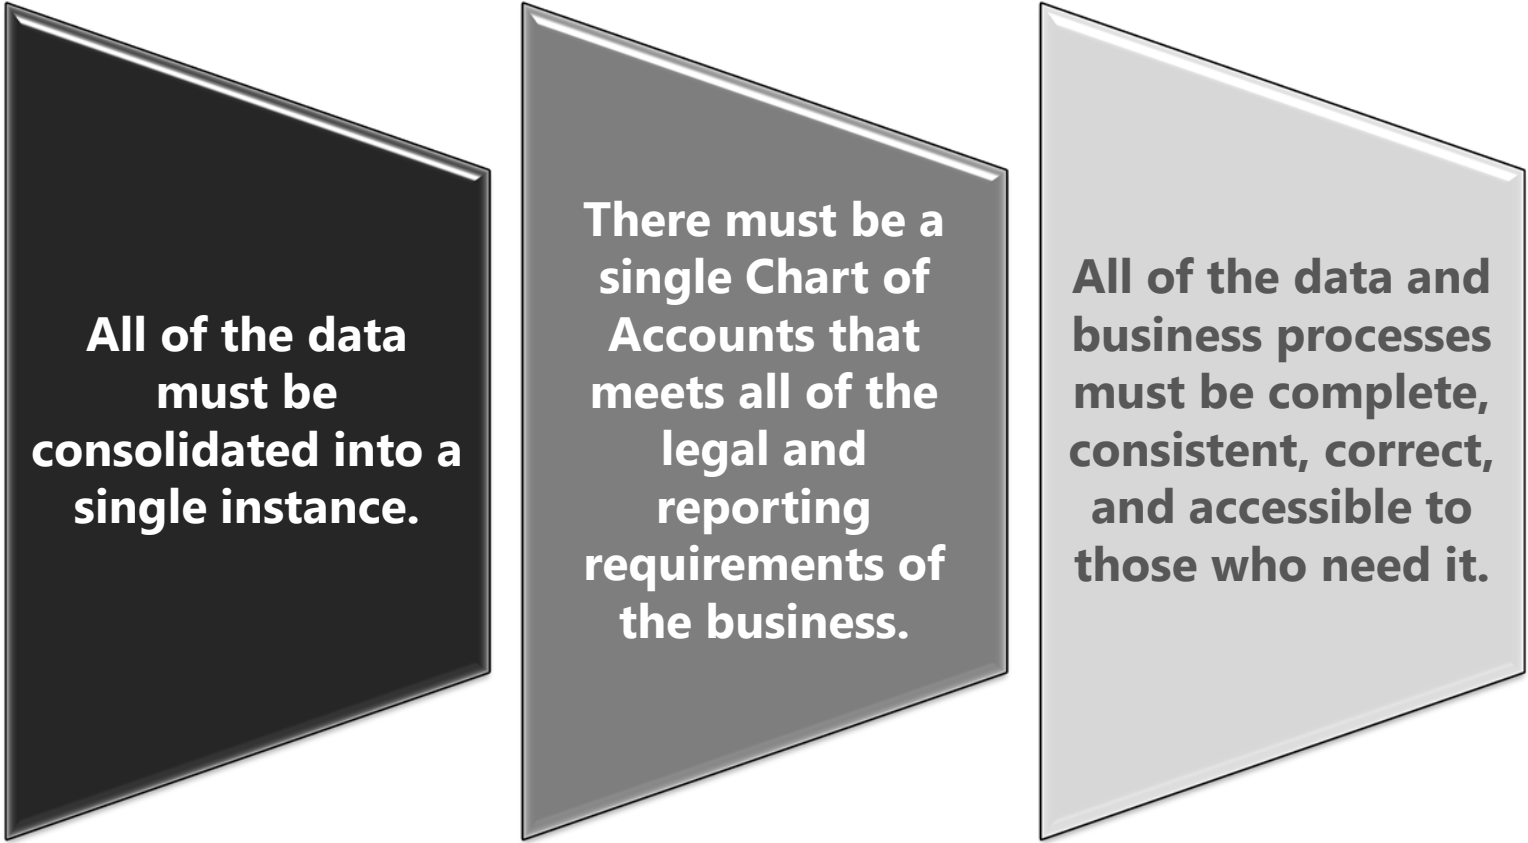

1. Identify the information that exists.
2. Determine what information needs to be shared.
3. Determine what information needs to be maintained separately.
4. Identify common business processes.
5. Must be championed from the top.

Accelerating the time for change in Oracle E-Business Suite

Roadmap to a Global Business – 3 Imperatives to Remove Silos

**All of the data
must be
consolidated into a
single instance.**

**There must be a
single Chart of
Accounts that
meets all of the
legal and
reporting
requirements of
the business.**

**All of the data and
business processes
must be complete,
consistent, correct,
and accessible to
those who need it.**

Accelerating the time for change in Oracle E-Business Suite

Reducing Costs: Multiple Instances into a Single Global Instance

Reduction in infrastructure costs
(hardware, maintenance, licenses)

Global Reporting/
Analytics

Consistent Business Processes

Provision of better customer service
and the ability to operate globally

Create Centralized Shared Services
(maintenance, setup, centralized
processing)

Eliminate duplicate
integrations and interfaces

Agility to grow and to
embrace new initiatives

Reduction in personnel to
support multiple systems

Reduce testing during
patches and upgrades

Lower license and support fees

Access real-time information at
consolidated level

Facilitate efficient and effective decision
making with timely and reliable fact based
information

Operation of a single business with consistent data,
streamlined processing and the ability to leverage
markets, suppliers of other parts of the business

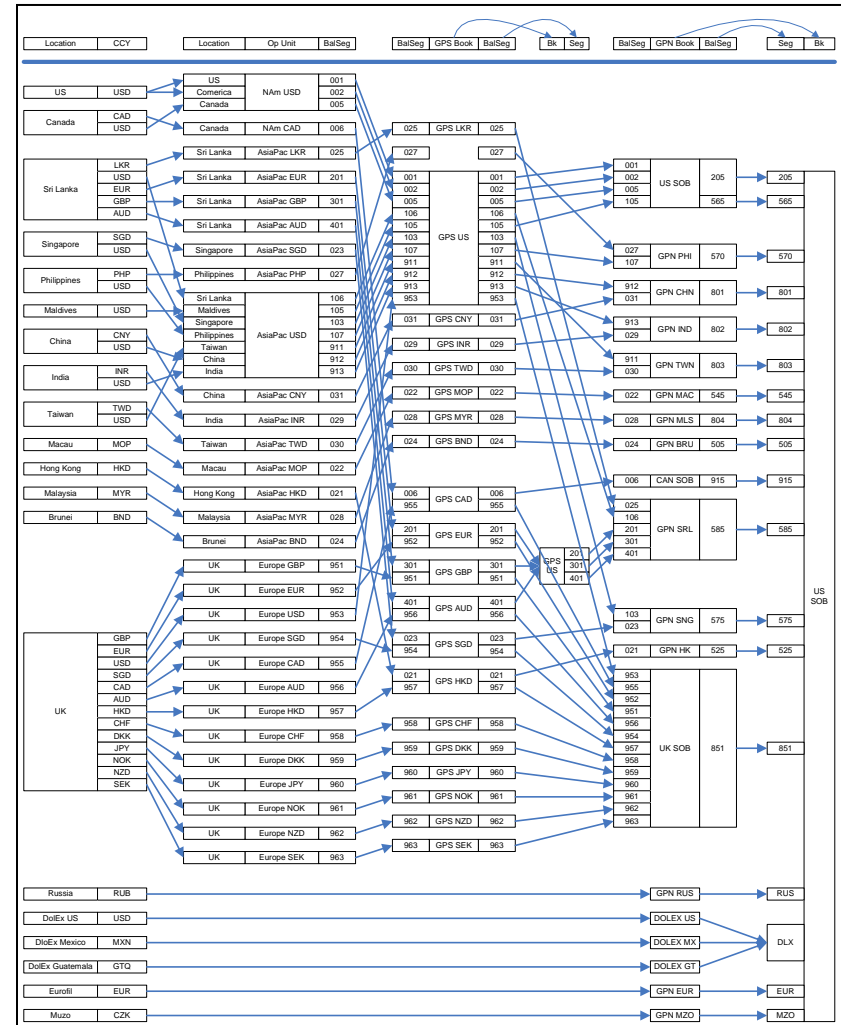

Accelerating the time for change in Oracle E-Business Suite

*e*prentise®

A Single COA Reduces Complexity

- Streamline the month- and year-end closing processes.
- No more messy financial consolidations using spreadsheets.
- R12 eliminates the need for using and maintaining multiple charts of accounts.

Accelerating the time for change in Oracle E-Business Suite

Benefits of Adopting a Single, Global COA

- 🐘 Restructures transactions to accurately reflect changes in the business.
- 🐘 Improves accuracy and speed of reporting.
- 🐘 Numerous routine tasks that would have taken up to a month can be reduced to days and in many cases be automated.
- 🐘 Within a single instance, a global COA reduces the time spent compiling, reconciling, and consolidating financial data from disparate systems and spreadsheets and reduces the close time between the different modules and GL.

Accelerating the time for change in Oracle E-Business Suite

Case Study: Global Supply Chain Management

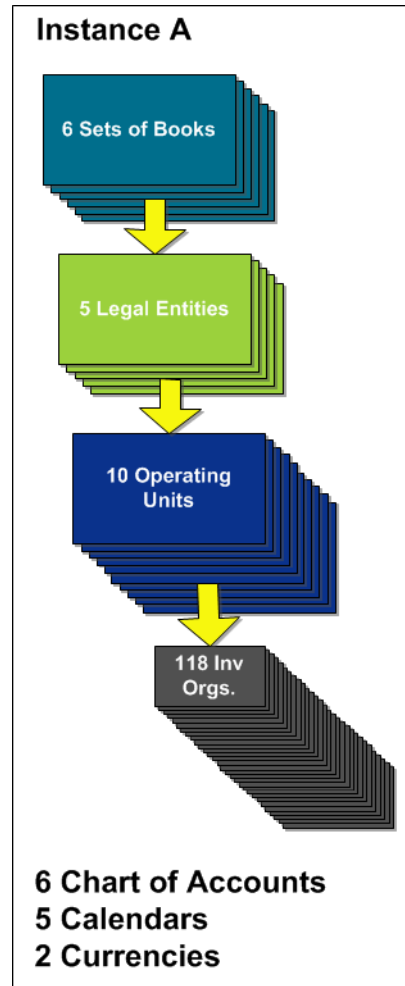

A \$22 billion global manufacturing company's supply chain was split between three instances, fifty-seven sets of books (w/ 20 COAs), sixty-six legal entities, sixty-three operating units, and one hundred seventy-two inventory orgs.

Accelerating the time for change in Oracle E-Business Suite

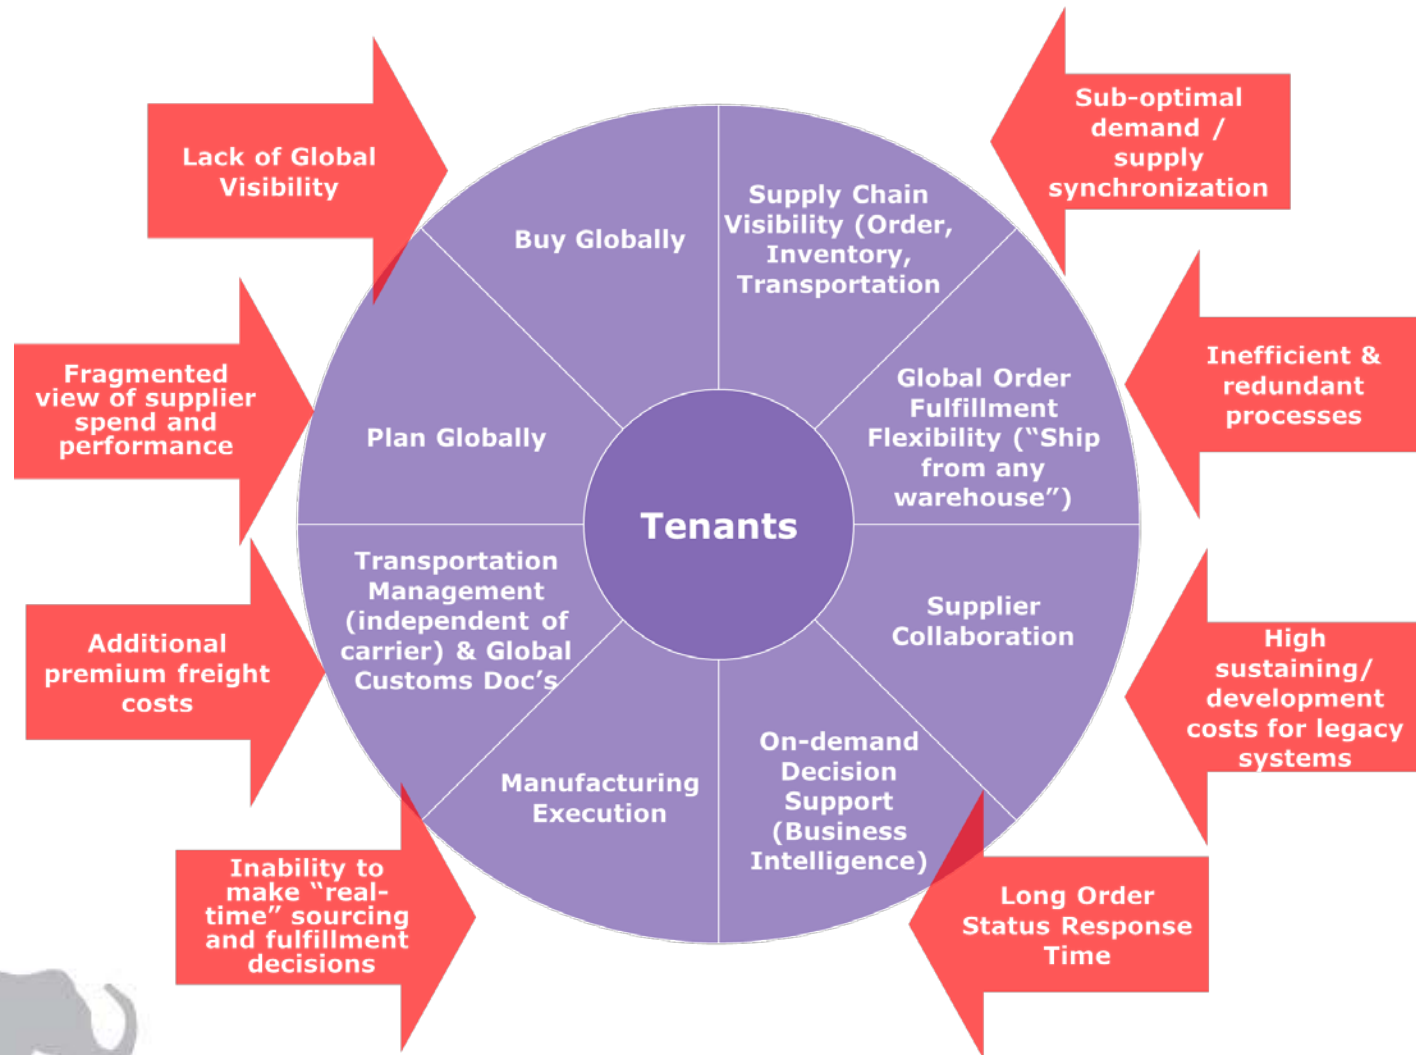

Case Study: Global Supply Chain Management

Accelerating the time for change in Oracle E-Business Suite

Case Study: Global Supply Chain Management

Accelerating the time for change in Oracle E-Business Suite

Case Study: Global Supply Chain Management- Strategy to Overcome Silos

Consolidate three instances into two; reorganize legal entities, op. units, and inv. orgs. by business process; and establish consistent charts of accounts to leverage global visibility:

- Go-to-Market Instance
- Global Supply Chain Instance

Accelerating the time for change in Oracle E-Business Suite

Objective 5: See how an enterprise data quality initiative will facilitate breaking down silos.

Accelerating the time for change in Oracle E-Business Suite

Breaking Down Silos

1. Begin with a plan

- Consolidate instances by business process into either a Go to Market Instance, or a Global Supply Chain Instance.

2. Define the scope and articulate the expected business results.

- Isolate key data Silos and quantify the value lost through their continued existence.
- Identify redundant business processes to be collapsed into one another.
- Define global quality standards and uniform conventions.

Accelerating the time for change in Oracle E-Business Suite

Breaking Down Silos

3. Execute, Implement, and Manage.

- Nominate and stand behind a benevolent dictator.
- Establish consensus.
- Align Instances, Calendars, COA, Operating Units, Inventory orgs, etc. to facilitate the flow of key data necessary to accelerate business processes.

4. Measure the Results.

- Ensure accurate data is quickly and easily accessible to requisite parties with enough time to capitalize on its value.

Accelerating the time for change in Oracle E-Business Suite

Benefits of Eliminating Silos

By taking these steps to eliminate silos within Oracle E-Business Suite, companies are able to:

- 🐘 Save money.
- 🐘 Improve processes.
- 🐘 Add value to existing operations.
- 🐘 Create an environment of complete, consistent, and correct information.

Accelerating the time for change in Oracle E-Business Suite

Conclusions

- 🐘 Many organizations face challenges to communicate between disparate parts of the business due to silos
- 🐘 Silos create the problem of knowing whose version of the “truth” is correct.
- 🐘 Lack of confidence in the quality of the data impacts operations and financial performance, increases resource, legal and audit costs and increases risks associated with regulatory compliance.
- 🐘 Bridging the silos starts with a shared data quality initiative.
- 🐘 Consolidate systems and structures that provide similar businesses processes (multiple instances, charts of accounts, and calendars for example) and resolve duplicate and incomplete data to eliminate multiple sources of “truth”.
- 🐘 Eliminating the silos will enable companies to share data effectively and communicate across the organization.
